Fund description

**Global equity product. The objective of this subfund is long-term (at least 3 years) growth in the assets' value per unit, higher than for the MSCI ACWI NTR index.** This subfund, the Company, or any other third party, however, does not guarantee the achievement of the above mentioned goal.

The risk level of investing in the subfund is high.

**The aim of the subfund's investment policy is to gain exposure to the global equity market.** The subfund invests primarily in Equity Instruments, mainly listed on markets other than the WSE. The rest of the subfund's assets that will not be placed in Equity Instruments will be invested in Debt Instruments, as well as in other financial instruments as defined in the statute. The subfund may hedge investments in financial instruments denominated in foreign currencies against exchange rate risk.

The Subfund's assets are invested in the global market, meaning there is no requirement to concentrate investments in a specific market, nor is geographical diversification mandatory. As a result, significant exposure to selected markets is possible. The Subfund's investments may be focused on growth stocks, including those in new technologies.

**The share of equities amounts to at least 66%** of the subfund's assets.

The subfund may be used to achieve high rates of return during good market conditions, or as a component of a diversified investment fund portfolio customised to the Investor's investment profile.

**The Subfund is a product referred to in Art. 8 SFDR (Regulation of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector), promoting environmental and social aspects.**

For the calculation of the performance fee, the subfund uses the model with reference to the MSCI ACWI NTR index benchmark, which is consistent with the actual investment policy of the Subfund. This means that the performance fee may be charged only in the event of achieving a relatively higher rate of return than the benchmark, ultimately in a 5-year reference period. In addition, the relative losses previously incurred in the reference period must be recovered before the performance fee is charged. The performance fee is 20%. The performance fee may only be charged once per calendar year, also in the case of a nominal loss after breaking the benchmark.
